LinkedIn: [linkedin.com/in/thanuraruksan/](https://www.linkedin.com/in/thanuraruksan/) Github: github.com/thanuraruksan

Professional Summary

DevOps Engineer with hands-on experience in Linux Systems, high-availability cloud infrastructure, and DevSecOps practices. Proven expertise in automating infrastructure/deployments using IaC tools and implementing monitoring stacks with Prometheus/Grafana, AWS CloudWatch. Passionate about building scalable, resilient architectures.

Education

B.Sc. (Hons) Eng. in Information and Communication Engineering
GCE Advanced Level, 2019 (Physical Science Stream)

SLTC Research University, 2022-2026
Mahinda College Galle, 2006-2019

Technical Skills

Cloud Platforms & Services: AWS (EKS, ECS, ECR, Fargate, EC2, S3, EFS, VPC, IAM, SSM Parameter Store)

Containerization & Orchestration: Kubernetes, Knative (Serverless), Docker, Docker Compose, Helm Charts

Infrastructure as Code: Terraform, Ansible

CI/CD & Version Control: GitHub Actions, Jenkins, Tekton, Git

Observability & Monitoring: Prometheus, Grafana, Alertmanager, Node Exporter, Amazon CloudWatch (Logs & Alarms)

OS, Security & Networking: Linux (RHEL/CentOS), Bash/Shell Scripting, System Hardening (CIS Benchmarks), TCP/IP, DNS, Load Balancing

Programming & Databases: Python, Java, JavaScript/TypeScript, MySQL, MongoDB, Redis

Work Experience

DevOps Engineer (Trainee) | 2024 - 2025 | [hSenid Mobile Solutions](#)

- Automated initial Linux RHEL server configuration and database provisioning using Ansible, reducing manual configuration time by 90%.
- Designed and deployed a comprehensive monitoring stack using Prometheus, Grafana, and Alert Manager; configured custom SNMP exporters and node exporters to provide real-time visibility into service health and resource utilization.
- Implemented CIS benchmarks for Apache 2.4, enhancing system security posture through automated configuration auditing and privilege refinement.
- Experience with clustered systems (PCS Clusters), worked with Apache servers hosted on clustered systems to ensure high availability.
- Conducted API endpoint testing and validation utilizing Postman, cURL, and WireMock.
- Optimized a complex internal shell-based framework for automated file housekeeping and log rotation, significantly improving system disk space management and auditing efficiency.
- Navigated the full Software Development Life Cycle (SDLC) within an Agile environment, actively participating in daily stand-ups and cross-functional collaboration.
- Experience in Git environments, Linux filesystems/tools, networking concepts/diagrams, network hardening methodologies, OS hardening methodologies.

Freelance Engineer | 2022 - Present | Fiverr, Upwork and Direct Clients

- Containerized and orchestrated React/Node.js microservices using Docker, Docker Compose, and K3s.
- Engineered ML pipelines, deploying predictive models as scalable RESTful APIs for backend processing.
- Developed and deployed 6+ end-to-end full-stack applications (React, MySQL) utilizing both 3-tier and monolithic architectures.
- Navigated tight deadlines and rapidly changing requirements, ensuring high client satisfaction.

Projects

- [Linux RHEL Server Configuration Automation](#)** (Linux, Ansible, Networking)
 - An automated approach to configuring, managing, and monitoring network and system settings on multiple Linux servers to avoid human errors and reduce manual configuration time by 90%.

- **[AWS ECS CI/CD Pipeline & Infrastructure](#)** (*Github Actions, Docker, AWS (ECS, ECR, Fargate), Terraform*)
 - Automated container build, test, and deployment workflows. Provisioned infrastructure as code using Terraform and orchestrated seamless deployments to AWS ECS using serverless Fargate launch type.
- **[AWS Multi-EC2 Observability Stack on VPC Environment](#)** (*AWS CloudWatch, EC2, VPC, SSM Parameter Store, Terraform*)
 - Configured a proactive monitoring and alerting stack across a multi-EC2 VPC environment, utilizing CloudWatch and SSM Parameter Store for centralized metrics and system health alarms. Terraform used for infrastructure provisioning.
- **[Diff-Pro, A tool to Advanced File Comparison](#)** (*Shell Scripting, Linux*)
 - A Linux-based tool for advanced file comparison. Used existing tool “diff” and extended its functionality to walk through directories and find permission, ownership, content differences.
- **[Serverless Kubernetes Architecture \(OpenClaw\)](#)** (*Kubernetes (K3s), Knative, AWS (EKS, Fargate, EFS), PVs*)
 - Engineered a cost-optimized Kubernetes deployment with persistent states. Implemented Knative with Kourier Gateway to enable scale-to-zero for API requests, backed by a comprehensive migration plan to AWS EKS and Fargate.
- **[DocRecords](#)** (*Microservices Architecture, ReactJS, NodeJS, ExpressJS, Docker, Docker Compose, K3s*)
 - Designed and developed a microservices based solution with multiple deployment types (Docker Compose, Kubernetes).

Certifications

- AWS Academy - Cloud Foundations (AWS)
- [Introduction to Containers, Docker, Kubernetes and OpenShift \(Coursera\)](#)
- [Continuous Integration and Continuous Delivery \(CI/CD\) \(Coursera\)](#)
- [Containers and Kubernetes Essentials \(Coursera\)](#)
- [Linux for Developers \(Coursera\)](#)
- Cloud Computing [Foundations/Advanced](#) (Great Learning)
- [AWS for beginners \(Great Learning\)](#)
- [Data Structures and Algorithms in Java for Intermediate Level \(Great Learning\)](#)
- [Introduction to Agile Development and Scrum \(Coursera\)](#)
- [Networks and Network Security \(Coursera\)](#)

Awards and Honors

- NASA Space Apps 2024, Seds SL ([Global Community](#), [Most Inspirational](#), [Local Impact](#), [Art & Technology](#))
- ACES Coders [v9 in 2022](#)/ v10 in 2023/ [v11 in 2024](#) (placed within top 20)
- [Cypher Hackathon, Kothalawala Defence University \(won 5th place\)](#)
- [Duothan 3.0, IEEE Student Branch of NSBM \(placed among top 10\)](#)
- [Codemania v3.0, SLTC Research University \(8th place\)](#)

Volunteering and Organizations

- Seds SLTC, 2024 Jan - 2025 Jan, Satellite and IT Divisional Manager
- IEEE Young Professionals - Innovation Nation Sri Lanka 2023/2024 (Coordinator)
- IEEE Student Branch of SLTC, 2024 June - 2025 June (Public Visibility Sub Committee Head)
- Leo Club of SLTC, 2023 - 2024 (Director - Research and Development)
